PROJECT NAME: StorySphere: A Safe and Interactive Digital Platform for Writers and Readers

GROUP MEMBERS: Efe Şahin, Selcen Aksu, Azra Bayhan, Berkay Gökçe, İsmet Eren Çetin, Ayça Baygar, Zeynep Ekin Zengin

#	STAKEHOLDER	DESCRIPTION
1	Authors	• **Success Impact:** They gain a secure platform where they can generate income and engage in direct interaction (live streams, etc.) with readers. • **Failure Impact:** The time spent migrating their works is wasted, and they lose their connection with their reader base. • **Contribution:** Producing content for the platform, growing the community by staying active, and testing new features to provide feedback.
2	Readers	• **Success Impact:** They enjoy a reading experience in a safe environment—purified from 18+ content via age verification—with innovative features like

		"Blend" reading and AI translation. • **Failure Impact:** They are forced to return to alternative platforms that are less secure and have limited interaction. • **Contribution:** Consuming content, providing reviews/ratings, and keeping in-platform interaction alive by joining clubs.
3	Services and Providers	• **Success Impact:** Generating revenue from API calls as the system is used and hosting a successful use-case on their platforms. • **Failure Impact:** Failure to reach expected API usage levels (the financial impact on them is minimal). • **Contribution:** Providing seamless server, database, and AI services to ensure 99.9% system uptime.

4	Competitors	• **Success Impact:** Risk of experiencing a decrease in market share and user bases. • **Failure Impact:** They continue to retain their current users. • **Contribution:** Indirectly serving as a source of inspiration and identifying a market gap through the analysis of their missing features.
5	Publishers and Editors	• **Success Impact:** They use StorySphere as a data source to discover new talents. • **Failure Impact:** They remain limited to traditional methods and miss out on digital trends. • **Contribution:** Extending professional offers to successful authors and increasing the literary quality of the platform.

6	Manga Artists and Visual Artists	• **Success Impact:** They gain a technological platform where they can showcase their visual works (manga-style) rather than just text-based stories. • **Failure Impact:** They lose the opportunity to present their works in a digital format. • **Contribution:** Producing visual content and testing the visual reading performance of the Google Cloud Vision-based OCR system.
7	Data Security Auditors	• **Success Impact:** They verify that age verification via e-Devlet and user data are processed in accordance with secure protocols. • **Failure Impact:** Data leaks or authentication errors lead to legal issues. • **Contribution:** Auditing the system's compliance

		with security standards (encryption/protocols).
8	Accessibility Advocates	• **Success Impact:** An inclusive platform emerges where individuals with disabilities are included, thanks to audiobook support and minimalist design. • **Failure Impact:** The platform appeals only to a specific audience and fails to be inclusive. • **Contribution:** Guiding the development of minimalist design and audio content (audiobooks) features.
9	Project Owner	• **Success Impact:** Achieving academic success (high grades) by owning the vision of the StorySphere platform and having a strong portfolio project with commercialization potential. • **Failure Impact:** Intensive effort and time spent going to waste, failing to reach academic goals, and

		an incomplete project experience. • **Contribution:** Determining the strategic goals of the project, coordinating all technical requirements (AI, WebRTC, etc.), and leading the project development process.
10	Advertisers	• **Success Impact:** Increasing brand awareness and gaining potential sales traffic by directly reaching a niche target audience consisting of authors and readers. • **Failure Impact:** Inefficient use of the advertising budget and loss of opportunity due to the project failing to reach target user engagement levels. • **Contribution:** Supporting the platform to remain free for users through the ad revenue they provide and making a financial contribution to cover

		operational costs.
11	Consulting Company (İbrahim Zincir, Deniz Eren Terziler)	• **Success Impact:** Gaining a strong mentorship reference and prestige upon the StorySphere project achieving its overall goals; generating financial profit (service fee/premium) in return for the professional consulting services provided. • **Failure Impact:** Damage to their strategic consulting reputation if the project fails due to managerial or technical errors, and experiencing financial loss due to uncompensated time spent or penalty clauses. • **Contribution:** Providing strategic guidance to the development team by offering expert opinions in the project's Sprint management, technical architectural decisions, and risk analysis processes.

12	Government	• **Success Impact:** Providing seamless age verification for 18+ content through e-Devlet integration and raising data security standards in digital publishing. • **Failure Impact:** Legal sanctions in case of age filter bypass or data leaks, LPPD (KVKK) violations, and loss of public trust. • **Contribution:** Providing the e-Devlet identity authentication API infrastructure and determining the necessary legal framework for digital content security.
13	BANK	• **Success Impact:** Providing secure payment traffic and gaining transaction volume when authors earn income from their published books or when readers use the subscription/donation system. • **Failure Impact:** Loss of financial transaction reliability and the potential loss of a digital payment business partner. • **Contribution:** Offering secure Payment Gateways for the platform's financial infrastructure and managing money transfer processes.
